## Fundamental

DroneShield produces detecting equipment and counterdrone weapons of both military and commercial quality. The majority of their armament systems, including the DroneGun, are portable jamming devices made to interfere with a UAV's communication link. Additionally, DroneShield manufactures a range of integrated radar/electronic warfare devices and RF detection systems that may be installed on vehicles or carried by a man. The nature of the industry in which EOS operates suggests a significant proportion of future sales revenue will likely materialise in the form of one-off contracts, often with no recurring revenue.

## Technical Analysis

Source: Trading view

Last week the stock has reached to its all-time high levels which shows that the upside will remain intact in the stock for coming months. Obviously all the indicators are positive and supporting upwards momentum to continue over short to medium term. **StockBinge recommends a “Buy” at the closing price of \$0.930 (as of 23<sup>rd</sup> April 2024) with stop loss of \$0.80 and Target will be \$1.20 for few months.**
